

GIANTPOLE - SPECIFICATIONS

1. Base Tank

Light weight base tank is made from durable plastic material (70 liter); Size: 80x80x20 cm, Weight: 5 kg

2. Pole

Anodized aluminum telescopic (4-Step System); Length: 540 cm (folded: 160 cm), Weight: 5,9 kg

3. Supporter

Tripod legs are connected to base tank and firmly hold the pole

4. Arm

Arm is connected to the top of pole and holds the top of flag. Flag attaches to arm using eyelets and rings.

5. Ring

Four rings are attached to the pole and provide natural rotation of banner by wind; three rings are attached to the arm to hold the top of banner

6. Bracket

Ring holds tripod legs and supports the pole

7. Release Button

Ball-type buttons make erecting pole easy

8. Stopper

Stopper prevents flag lifting in wind; slide it above the lowest ring after installation

9. Banner

Size: 110x330-390 cm

10. Fixing Bolt

Fixing bolt prevents the arm from being separated from the pole

11. Snap Ring

Snap rings lock the tripod to the corners on the base tank
